DON'T FORGET TO BOOK YOUR ANNUAL TUNE-UP

A good on demand tank-less water heater can lower your monthly expenses and provide you with a never ending source of hot water. In addition, we can usually install your new unit quickly as well as remove your old water heater.

Today there is really no reason to put up with expensive or low quality hot water. Call us today to find out how these systems can help you save money and enjoy better hot water.

Forget about that messy, inefficient fireplace this winter. Thurston Energy can install a propane fired log set in your existing masonry fireplace that will make your home more comfortable and carefree. Log-sets are a safe and efficient supplemental heat source that can be counted on to work even if the power is out. Imagine coming home to a cozy fire on a cold winter night that starts and stops with the push of a button. No more hauling in logs and dealing with messy ash!

We invite you to explore the possibilities of a propane fired log-set by scheduling your free in-home consultation by calling us at 203-729-5274
